Quick Content! All Suggested Posts Ready to be Posted

Monthly, we send you an updated social media guide on the High Impact Practices in Family Planning (HIPs) with the purpose of (1) increasing awareness and use of the HIP briefs, and (2) generating traffic on the HIP website. Beginning in October 2021, we started including posts for sharing on LinkedIn. Please share!

June 20th is [World Refugee Day](#), an international day designated by the United Nations to celebrate and honor the strength and courage of people who have been forced to flee their home country to escape conflict or persecution. World Refugee Day is an occasion to build empathy and understanding for their plight and to recognize their resilience in rebuilding their lives. In light of this, the focus for this month's social media package is on the HIP Strategic Planning Guide (SPG): [Family Planning in Humanitarian Settings](#).

This SPG is broken into three main overlapping phases in a humanitarian crisis—preparedness, emergency response, and recovery—and provides key actions to ensure continuity and resiliency of FP/RH programming in each phase.

June 20th is [World Refugee Day](#), an international day designated by the United Nations to celebrate and honor the strength and courage of people who have been forced to flee their home country to escape conflict or persecution. World Refugee Day is an occasion to build empathy and understanding for their plight and to recognize their resilience in rebuilding their lives. Ensuring continuous access to #FamilyPlanning for populations experiencing a humanitarian crisis is needed, demanded and feasible. So let's turn again to the HIP Strategic Planning Guide (SPG) [Family Planning in Humanitarian Settings](#), as it provides helpful actions family planning programs can take to limit service delivery disruptions in crisis settings.

This SPG is broken into three main overlapping phases in a humanitarian crisis—preparedness, emergency response, and recovery—and provides key actions to ensure continuity and resiliency of FP/RH programming in each phase.
