HIP brief presentations are adaptations of the HIP briefs and are intended to make it easier to present specific HIPs to various audiences. These [PowerPoint slides](#) are downloadable, include speaking notes for the presenter, and are fully editable to adapt to your needs. Thirteen (13) new HIP slide decks have been created for the Service Delivery, Enabling Environment, and Social and Behavior Change categories, which means that each HIP brief now has an accompanying slide deck version. One of the aims of this initiative is that these presentation slide decks can be used to support HIP scale-up and implementation, whether in a presentation to ministries of health or other governmental bodies, communities of practice or other convenings and coordinating groups, or within organizations who require more information and guidance on implementing a specific high impact practice.
