

## Suggested Tweets for HIP Partners focused on the Updated Policy Brief

Quick Content! All Suggested Tweets Ready to be Posted

Monthly, we send you an updated social media guide on the High Impact Practices in Family Planning (HIPs) with the purpose of (1) increasing awareness and use of the HIP briefs, and (2) generating traffic on the HIP website. Beginning in October 2021, we started including posts for sharing on LinkedIn. Please share!

This month's social media messages are focused on the update to the Policy brief, now titled: [Comprehensive Policy Processes: The agreements that outline health goals and the actions to realize them](#). This HIP brief details how to comprehensively develop, implement, and monitor policies to support high-quality family planning at scale. Policies are often developed without adequate attention to the range of actions necessary to achieve the goals of the policy. When this happens, a policy remains a mere document. The actions necessary for policy success are presented in the brief as stages in an iterative process. Evidence and tips are provided to support the development, implementation, and monitoring of policies supportive of rights-based family planning, an essential component in creating an enabling environment for and guiding the provision of high-quality family planning programs and services.
